Subject: Microsoft Settlement

I think the settlement, as currently phrased, does not serve the consumer's, nor the country's best interest.

In my experience (not opinion), Microsoft's anti-competitive behavior has reduced innovation and resulted in higher prices. A more significant step has to be made to keep them from pursuing these practices with renewed vigor.

Please reconsider the settlement, and level the playing field for all US technology companies.

thanks,
Dr. Dylan McNamee
